SAMPLE WEB DEVELOPMENT PROJECTS

MYFLIX | Angular | September 2021

A single-page, responsive movie application built using the **MEAN stack** (MongoDB, Express, Angular, and Node.js). This app allows registered users to browse movies by specific criteria and update personal information, including a list of favorite movies.

Live Project: <https://jborchers.github.io/myFlix-Angular-client/>

Movie API | June 2021

A RESTful API created using Node.js and Express, which interacts with MongoDB (a non-relational database). The API can be accessed using HTTP methods like GET, POST, PUSH, and DELETE. Data is manipulated using the CRUD method (Create, Read, Update, Delete).
