SAMPLE WEB DEVELOPMENT PROJECTS

MYFLIX | Angular | September 2021

A single-page, responsive movie application built using the MEAN stack (MongoDB, Express, Angular, and Node.js). This app allows registered users to browse movies by specific criteria and update personal information, including a list of favorite movies.

Live project: <https://jborchers.github.io/myFlix-Angular-client/>

MEET APP | React Native | June 2021

A serverless, progressive web application (PWA) built using React Native as well as a test-driven development (TDD) technique. This app uses the Google Calendar API to fetch upcoming events and is able to work offline. Data visualization was used to display the popularity of events by genre as well as the number of events by location.

Live project: <https://jborchers.github.io/meet/>

WORK EXPERIENCE

MISSIONS DOOR, Denver
